

## **Brief Bio**

### **Tim Gee**

Tim Gee is Principal and founder of Medical Connectivity Consulting ([www.medicalconnectivity.com](http://www.medicalconnectivity.com)). Tim's practice revolves around workflow automation through the integration of medical devices with information systems, and enabling technologies. He advises healthcare providers and manufacturers on needs assessment, requirements, workflow and patient flow analysis, regulatory issues, product development, sales and marketing. Markets covered include both acute and ambulatory care.

With over 25 years of experience, Tim has worked with care delivery processes, therapeutic and diagnostic modalities in most clinical areas, and e-health transactions between physicians, hospitals and payors.

Tim is the 2012 recipient of the American College of Clinical Engineering's Challenger Award. He speaks frequently at industry conferences and corporate events, and is currently the program chair and principal organizer for the Medical Device Connectivity conference.

A number of publications include Tim on their editorial advisory boards, and he participates in key industry interoperability development efforts, and is an advisor to a number of early stage companies.
